## Rehabilitation Projects

We tackle even the trickiest of renovation and conversion projects. Whether you need to mount to a roof, brick exterior or other substrate our products can easily be engineered to meet your needs. Our staff will work with you for engineering and architectural compliance.

## Roof Decks

Constructed with a welded aluminum frame, aluminum decking and railing, our roof decks are engineered to last a lifetime and maintain their great looks in any climate.

## Apartments & Condos

Easy to install, with multiple mounting options. Increase the value and appeal of your next project. We have all the documentation for load ratings and non-combustibility compliance.
